*“Prevention and Management of Medical Emergencies in the Dental Office”*

**Presenter:** John Brewer, EMT-P  
**Credit:** 6 hours  
Facial Surgery Center, Greensburg,

PA brewerdei@gmail.com

Mr. Brewer is a part-time paramedic with 30 plus years of experience in EMS working as a career paramedic in an urban/suburban area just south of Pittsburgh Pennsylvania. Mr. Brewer has worked extensively with the dental community since 1998. He is a member of the ADASA. He provides BLS, ACLS and PALS, courses in addition to medical emergency courses for individual offices, dental societies, PSOMS, University of Pittsburgh School of Dental Medicine, UPMC Children’s Hospital Dept. of Pediatric Dentistry. Mr. Brewer assists in teaching the IV sedation course for

various programs. Mr. Brewer also assists with helping offices purchase and organize emergency equipment, and prepare for office evaluations. Mr. Brewer has lectured in several states on the topic of medical emergencies in the dental office. Recently co-authored a chapter on Medical Emergencies for Nowak: Pediatric Dentistry: Infancy through Adolescence, 6e. In 2014 Mr. Brewer began working as a dental anesthesia assistant in several oral surgery and dental offices.

**Overview:**

Medical emergencies can occur at any time in the dental office. Preparation for such emergencies is extremely important. A team approach ensures that all members of the dental team are prepared to handle emergency situations effectively. Through lecture

and emergency case review, participants will improve their recognition and understanding of medical emergencies in the dental office setting.

**Objectives:**

Upon completion of the course, participants will be able to:

- Discuss the most common medical emergencies
- Discuss drug related emergencies
- Identify drugs/supplies required for the Dental Office Emergency Kit
- Review the medical history and identify patients at risk for medical emergencies
- Systematically approach the management of an in-office emergency
- Identify various levels of sedation and who can provide what level of sedation in the office.

*“Feel Good Dentistry: Enjoy Your Practice And Feel Better About Yourself And Your Work. A ‘Sane’ Approach To Esthetic Restorative Dentistry”*

**Presenter:** Steven P. Weinberg DMD  
**Credit:** 6 hours  
Dr. Weinberg

is a Clinical Assistant Professor at The University of Pennsylvania School of Dental Medicine and an Adjunct Instructor at The Kornberg School of Dentistry Temple University in their Departments of Restorative Dentistry. He received his Certificate of Proficiency in Esthetic Dentistry from The State University of New York at Buffalo. He opened his private practice in New Jersey in 1978. He has been lecturing nationally and internationally on esthetic and restorative dentistry for over 31 years.

**Overview:**

This program will cover: Why dentists think, act and react the way they do; stress free patient relations; effective patient communication techniques;

recovering the excitement, enthusiasm and satisfaction of being a dentist; changing phobic patients into happy and trusting patients; internal and external marketing plans; fool-proof methods to motivate patients to desire and accept esthetic dental procedures; how to address the issue of dental insurance and esthetic/restorative procedure fees; revelations in the newest and current multiple surface bonding and luting systems; porcelain or composite laminate veneers; indirect light and heat-processed composite and porcelain inlays and onlays; simplified approach to occlusion; color theory and its application in dental procedures – easiest & high tech accurate shade match. Good counsel that doctors can apply the very next day.

**Objectives:**

- Attendees should leave the course feeling better about themselves, their patients and their staff.

- The attendees will have a better understanding of the psychology of dentists
- They will learn how esthetic dental procedures can change the landscape of their practice
- The entire dental team will learn techniques to motivate patients to accept suggested dental procedures, keep them happy and improve their self-esteem
- Attendees will learn about a variety of anterior and posterior esthetic restorative procedures including helping hints to make these procedures easier, faster and predictably successful
- They will learn how to correct extremely challenging cases including: fractured porcelain on crowns and fixed bridges, severely discolored teeth, severe worn dentition cases, misalignment cases (“instant orthodontics”)

*“Geriatric Dentistry: The Fastest Growing Demographic in Dentistry”*

**Presenter:** Lou Graham, DDS

**Credit:** 6 hours

Multi-specialty group practice, University Dental Professionals, Chicago, IL

Internationally recognized lecturer; founder of the Catapult Group.

Dr. Graham is an internationally recognized lecturer extensively involved in continuing education for dental professionals. His lectures focus on incorporating current clinical advancements through “conservative dentistry.” He emphasizes the same concepts he practices: dental health diagnosis, treatment plans for medically compromised patients, conservative treatment, cosmetic dentistry, and customized approaches to periodontal care, implants and laser dentistry.

Dr. Graham is the founder of the Catapult Group, a continuing education company whose philosophy and programs use contemporary,

interactive formats to integrate time-proven conservative dentistry with 21st century materials and techniques. He is a published author in many leading national and international dental journals. He is a member of the American Dental Association, American Academy of Cosmetic Dentistry, Academy of General Dentistry, Chicago Dental Society and Illinois Dental Association. Dr. Graham is a graduate of Emory Dental School. He is the former Dental Director of the University of Chicago’s Department of Dentistry. He enjoys providing dental care at his multi-specialty private practice group, University Dental Professionals, in Chicago, IL – Hyde Park.

**Overview:**

With patients entering their 8th and 9th decades of life and even more, our role as health care providers continues to face new challenges in treating this population. As these patients walk

into our offices, they present challenges that are often unique and require customized approaches to their care.

**Objectives:**

Upon successful completion of this course, attendees will learn:

- Prevention is for all ages and doesn’t stop here!
- Why this patient population loves our in-office: PREVENTION PLAN”
- Customizing your approaches for plaque, xerostomia and so much more.
- Reparative dentistry, when, where and why and what materials are best to utilize
- Customized periodontal protocols that go beyond brushing and flossing
- Advanced restoratives technique for: post and cores, deep class 2’s, “elevating the margin” technique, perio-splinting, choosing the right cement

*“Essential Pharmacology for Treating Medically Complex Dental Patients”- AM session  
“Frequently Prescribed Medications and Clinical Dental Considerations” - PM session*

**Presenter:** Thomas Viola, RPh, CCP

**Credit:** 6 hours

Practicing pharmacist, clinical educator, published writer and professional speaker

Thomas Viola, the founder of “Pharmacology Declassified”, is a board-certified pharmacist who also serves the professions of dentistry as a clinical educator, professional speaker and published author. Tom is a member of the faculty of ten dental professional degree programs and has received several awards for outstanding teacher of the year. Tom has presented hundreds of continuing education courses to dental professionals, nationally and internationally, in the areas of oral pharmacology and local anesthesia and is well-known for his regular contributions to several dental professional journals. Through his informative, humorous and engaging live seminars and webinars,

**Overview:**

Dental implications of the prescription medications, nonprescription medications, herbal products, nutritional supplements and substances of abuse most frequently used which may have the greatest impact on dental therapy to our medically complex patients.

**AM Objectives:**

- Identify the prescription medications most frequently encountered on a patient’s medical history and discuss their indications for use, adverse reactions and impact on dental therapy.
- Discuss the non-prescription medications most often used by dental patients and explain their impact on dental therapy, including situations which preclude their use.
- Identify the most popular herbal products and nutritional supplements and discuss their purported uses

and dental considerations.

- Identify the most common substances of abuse and describe their oral manifestations and dental treatment considerations.

**PM Objectives:**

- Identify the most frequently prescribed FDA-approved brand name medications for the treatment of systemic illnesses.
- Discuss the basic mechanisms of action, potential adverse reactions, drug interactions and contraindications of these medications
- Explain the clinical dental considerations of these medications and their potential impact on dental therapy
- Describe patient management strategies essential for successful treatment planning and proper care of our medically complex dental patients.
